CAMOUFLAGE

Since the battlefield knows no hours, there is Nyx. Limited light sources and nocturnal prey requires undetectable concealment. Utilizing darker colors that blend and hide in dusk to dawn conditions, Nyx is superior coverage when senses are heightened.

NYX
TACTICAL / NIGHT

CAMOUFLAGE

EKHO
TACTICAL / URBAN

In vulnerable urban environments, concealment is of utmost importance. The blend of gray colors with the scale armor of our Virtus Ekho provides a tactical advantage in populated terrain. Regardless of lighting or elements, Ekho meets the challenge of modern day warfare.

CAMOUFLAGE

TARIIS
MULTI-TERRAIN

A forest background offers a myriad of patterns, light play and textures to contend with. Tariis mimics earth tones and contrasts to become undetectable in woodland coverage and increase range of engagement.

CAMOUFLAGE

With five colors to blend well with geographical tones of rocky, arid regions, as well as mimicking the shadow properties of open, barren regions, Xeros is designed for long-range concealment.

XEROS
DESERT / ARID

CAMOUFLAGE

Delos is our water pattern. Delos will keep you concealed under the water and also serve above and beyond on marine environments

CAMOUFLAGE

PYRA
SPORT / COMPETITION

Pyra is our athletic pattern but also serves as an emergency safety color scheme to keep visibility in rescue operations

CAMOUFLAGE

Boreas is our patented snow camouflage, it will give you total cover and concealment in snow and ice, as well as high mountain alpine terrain.
